

As part of working with BCS, The Chartered Institute for IT, all successful BCS candidates are eligible for a year's free Associate Membership, enabling them to get more from their professional certification and to support their career development.

We're now making it even easier for candidates to take up their membership by introducing a new activation process.

**How will candidates receive their free membership?**

As of Wednesday 2<sup>nd</sup> March, candidates can activate their BCS Associate Membership when they collect their results in e-Professional – it's that simple!

The new activation process in e-Professional allows candidates to sign up to our Code of Conduct and confirm their log-in details. Those who sign up will then receive a membership welcome email and can begin to enjoy the many benefits that BCS membership brings to their career.
